

Thank you for choosing Chilewich.

Maintenance Instructions - Worktop

Designed and made in the USA, your new Worktop is extremely durable and features integrated protection against mold and mildew that lasts for the lifetime of the product. The guidance below will help to keep it in peak condition for many years to come.

CARE

Occasionally lift and air out your Worktop, which allows it—and the surface on which it sits—to ventilate and stay dry.

Do not place objects made of rubber on your Worktop, as they can cause discoloration.

CLEANING

Cleaning is easy. Wipe face of Worktop with damp cloth, using mild detergent as needed. In case of heavy soiling, rinse Worktop with water and allow to dry before replacing. When cleaning surface on which Worktop sits, allow surface to dry completely before replacing it.

In case of spills, blot face of Worktop with a lint-free cloth. Scrub spots and stains with medium-bristle brush after treating with spot cleaner or bleach-based cleanser. Air dry thoroughly.

For deep cleaning, we recommend hot water extraction with mechanical brushing using equipment such as the Rug Doctor Deep Carpet Cleaner, Rug Doctor Mighty Pro X3, or Bissell Big Green Deep Cleaning Machine.

Do not machine wash or iron.

OUTDOOR USE

When properly maintained, your Worktop will perform well outdoors. It is woven with fade-resistant TerraStrand yarns but, like all textiles, may fade when placed in full sunlight for extended periods.

STORAGE

Roll up Worktop with the woven side facing outward.
