

Chilewich Woven Rugs

BOTANIC, Madder

Durable. Designed with both beauty and function in mind, Chilewich woven rugs retain their distinctive colors and rich textures over many years of use, indoors and outdoors. Suitable for use on floors with radiant heating, provided that the floor temperature does not exceed 85°F/30°C. Self-bound edge prevents fraying and provides clean, finished look.

A sleek, stay-put backing. Chilewich rugs are cushioned with a commercial-grade latex backing that prevents slipping and curling. This creates a protective barrier for your flooring, as water is less likely to penetrate the surface of the rug.

Easy maintenance. Sweep or vacuum to remove loose dirt or wipe clean with soap, water, and a soft sponge or cloth. It is recommended to flip the mat occasionally to allow the backing and surface beneath it to dry.

Expanded size range. The Chilewich made-to-order rug program offers custom, extra-large sized rugs that can be designed to meet your specifications. Refer to the Chilewich website or your customer service representative for more information.

Protection against mold and mildew. Strengthened by Microban™, these mats resist stain- and odor-causing microbial growth. This protection works continuously for the lifetime of the product.

Better for people and the planet. The phthalate-free extruded yarn uses vegetable-based compounds in place of petroleum-based plasticizers. All Chilewich products contain at least 18% rapidly renewable content.

Customizable. We are able to accommodate special shape requests with the receipt of a CAD design. Lead time is approximately 3-4 weeks for custom shapes and sizes.

MOIRÉ, Zephyr

BOUCLÉ, Tangerine - Latex Backing

WOODGRAIN, Slate

Placement

- Best suited for dry surfaces.
- Latex-backed woven rugs are compatible with radiant heat flooring up to 85°F/30°C.
- Made with advanced color technology to prevent fading. However, like all textiles, rugs may fade if exposed to direct sunlight for long periods of time.
- Latex backing may tear if placed on a rough surface. This will not affect the woven face of the rug or its performance, but a rug pad can be used to prevent tears.
- Suitable for outdoor applications.

Care

- It is recommended to occasionally air out rug by turning it over to allow both the backing and surface underneath to dry.
- If saturated with liquid, backing will absorb the moisture, yet excess may migrate to the surface the rug is on.
- When moving or storing, roll up the rug with the woven fabric facing outwards.
- Avoid placing objects made of rubber (including rubber castors) on your rug, as it may cause discoloration.

Cleaning

- If dirty, vacuum and/or rinse and wipe clean with cloth.
- To deep clean, hand-wash rug with water and light detergent.
- After cleaning, always air dry completely before placing on the floor.
- Do not machine wash.
- See complete maintenance instructions at www.chilewich.com/restaurants_hotels/product-maintenance
